Application for Growth Development Intern – starting from May 1st, 2025

Dear Recruiting Team,

I am currently in the first semester of my Master's in International Business at WHU – Otto Beisheim School of Management. I would like to apply for the Growth Development Intern at Enpal and am available from May through August 2025.

During my studies at WHU, I had the opportunity to meet Enpal employees during a campus visit, where they discussed the company's mission to make green energy accessible. I became interested in Enpal's vision of a solar energy system on every roof, a storage unit in every house, and an electric car in every garage. This goal reflects the potential of renewable energy in shaping a sustainable future. Having studied engineering in Biotechnology and covering renewable energy as one topic I understand the critical role these solutions play in our future. I am excited by the opportunity to contribute to solutions that make green energy easy and accessible.

My WHU course in International Strategy provided an in-depth understanding of various business models and strategic frameworks. This course sparked an interest in the strategies that drive success or failure in major organizations, such as Coca-Cola, Boeing, and Hindalco. As I delved deeper into case studies, I became fascinated by how strategic choices can shape an organization's future, impact its competitive positioning, and ultimately determine its success. This structured, forward-thinking approach, where every decision considers multiple potential outcomes, appeals to me and motivates me to further explore the field of strategy. I received top marks for the course (1.0) and was commended for my insights, reflecting my analytical and structured approach to problem-solving. This academic experience, combined with my professional background, has given me a unique perspective on addressing business challenges within a strategic context.

In my previous role as Sales Team Lead at Pickyourtrail, I gained valuable experience in planning and coordinating tasks across a team. My different responsibilities taught me the importance of considering each team member while adopting a team-wide strategy that kept everyone aligned and motivated. Each month, I reviewed performance data and client conversion metrics to highlight which destinations were driving the best results. This analysis helped me focus our efforts on high-potential destinations and adapt our sales pitches to match client preferences and seasonal demand. By guiding my team in these efforts, I learned how strategic insights can be practically applied to achieve measurable goals—a skill I am eager to develop further in this role. I also worked closely with team members who needed extra support, looking into their performance metrics to identify improvement areas and addressing any other factors that might impact their motivation. This experience taught me the value of combining strategy with practical team management—a skill set that aligns well with Enpal's focus on high-impact, collaborative work environments.

In my role at Pickyourtrail, I also developed innovative client acquisition strategies, targeting high-potential markets identified through market analysis of top selling destinations experiencing heavy tourism. This experience sharpened my ability to analyze market opportunities and devise actionable strategies to drive business growth.

My engineering background, combined with my studies in international business, equips me with a unique perspective that blends technical knowledge with strategic acumen. Enpal's Internship offers an exceptional opportunity to acquire the practical skills required to excel—an experience no classroom can replicate. I am confident that my curiosity, commitment to learning, and persistence in facing challenges will help me excel in this internship and make a meaningful contribution.

Thank you very much for considering my application. I am excited about the opportunity to learn from the team at Enpal, and I look forward to discussing my fit for the program in further detail.

Sincerely,
Shruthi Sankaranarayanan
