Application for Strategy & Business Internship – starting from May 1st, 2025

Dear Recruiting Team,

I am currently in the first semester of my Master's in International Business at WHU – Otto Beisheim School of Management. I would like to apply for the Strategy & Business Internship at Frieda Health and am available from May through August 2025.

At WHU, my coursework in International Strategy and Data Analytics has equipped me with the tools to analyze complex business challenges, evaluate market opportunities, and craft actionable strategies. I received top marks in International Strategy (1.0) for my ability to identify key business drivers and provide structured solutions. Through case studies on leading companies like Boeing and Coca-Cola, I developed a deep understanding of how strategic decisions impact competitive positioning and long-term success. This academic experience has strengthened my ability to apply a forward-thinking approach to solving challenges, making me eager to contribute to Frieda's projects.

Professionally, my journey at Pickyourtrail has been instrumental in building my analytical, leadership, and customer-focused skills. I began as an individual contributor, honing my expertise in cold calling, building rapport, and understanding customer needs. Within one year, I generated €463K in revenue, which led to my promotion as Sales Team Lead in just 1.5 years. In this role, I managed a €2.6 million annual revenue target, led a team of six, and introduced data-driven strategies to optimize the sales pipeline. By identifying customer pain points and tailoring solutions, I not only exceeded team performance goals but also enhanced overall operational efficiency. These experiences have prepared me to take on multifaceted roles like the one at Frieda, where cross-functional collaboration and strategic problem-solving are key.

At Pickyourtrail, I also developed innovative client acquisition strategies, targeting high-potential markets identified through market analysis of top selling destinations experiencing heavy tourism. This experience sharpened my ability to analyze market opportunities and devise actionable strategies to drive business growth.

In addition to my studies in business, my academic background in psychology has deeply sensitized me to understanding human behavior and the emotional journeys individuals experience during significant life transitions. This has prepared me to approach industries like women's health with empathy and a nuanced perspective. As a woman, I personally resonate with Frieda's mission to transform the menopause journey into an empowering and positive experience. I understand how this critical phase impacts not just physical health but also emotional well-being, and I am driven to contribute to creating solutions that make a meaningful difference.

I am confident that my analytical mindset, structured problem-solving approach, and entrepreneurial spirit align with Frieda's vision. Thank you for considering my application. I look forward to the opportunity to discuss how my background and skills can contribute to Frieda's Strategy & Business initiatives.

Sincerely,
Shruthi Sankaranarayanan
