Application for Marketing Associate

Dear Recruiting Team,

I am completing my Master's in International Business at WHU – Otto Beisheim School of Management, graduating in August 2026. I am currently based in Düsseldorf, Germany, and am fully open to relocating to the Netherlands. I would like to apply for the Marketing Associate role at QuantWare.

My undergraduate degree in Biotechnology is the foundation of why QuantWare's mission resonates with me as more than marketing ambition. I studied how science-driven breakthroughs move from laboratory to real-world application, and quantum computing is, to me, the most consequential example of that progression underway right now. Understanding the technology you are marketing and being genuinely curious about it changes how you communicate it. I want to bring that depth to how QuantWare's brand shows up in the world.

The execution side of this role is where my experience is strongest. In my current internship at Henkel Adhesive Technologies, I coordinate the full scope of campaign deliverables for the Pattex rebranding, managing timelines and assets across lead creative agencies, local brand managers in multiple markets, and senior leadership, including the Marketing Director and VP. I prepare strategic presentations for C-suite audiences and external agencies, and ensure that brand decisions translate cleanly into execution across every channel. Prior to Henkel, I led a team of six at Pickyourtrail, where I owned cross-functional coordination among sales, product, and customer support, managed pipelines, and drove a €2.6M annual revenue target, an experience that hardwired in me a structured, ownership-driven approach that QuantWare is looking for.

I am available from August 2026, excited by the prospect of relocating to the Netherlands, and ready to help QuantWare build its presence in the deep-tech landscape from day one.

I would welcome the opportunity to discuss my application further and am available for an interview at any time that is convenient for you.

Sincerely,
Shruthi Sankaranarayanan
