Application for Sales Steering & Enablement Intern – starting from May 1st, 2025

Dear Recruiting Team,

I am currently in the first semester of my Master's in International Business at WHU – Otto Beisheim School of Management. I would like to apply for the Sales Steering & Enablement Intern at TeamViewer and am available from May through August 2025.

At WHU, my coursework in International Strategy and Data Analytics has equipped me with the tools to analyze complex business challenges, evaluate market opportunities, and craft actionable strategies. I received top marks in International Strategy (1.0) for my ability to identify key business drivers and provide structured solutions. Through case studies on leading companies like Boeing and Coca-Cola, I developed a deep understanding of how strategic decisions impact competitive positioning and long-term success. This academic experience has strengthened my ability to apply a forward-thinking approach to solving challenges, making me eager to contribute to TeamViewer's projects.

Professionally, my journey at Pickyourtrail has been instrumental in building my analytical, leadership, and customer-focused skills. I began as an individual contributor, honing my expertise in cold calling, building rapport, and understanding customer needs. Within one year, I generated €463K in revenue, which led to my promotion as Sales Team Lead in just 1.5 years. In this role, I managed a €2.6 million annual revenue target, led a team of six, and introduced data-driven strategies to optimize the sales pipeline. By identifying customer pain points and tailoring solutions, I not only exceeded team performance goals but also enhanced overall operational efficiency. These experiences have prepared me to contribute effectively to TeamViewer's sales processes, such as selling software licenses, assisting customers, and managing offers.

Additionally, my experience with cross-functional collaboration has taught me the importance of working closely with different teams to achieve business goals. At Pickyourtrail, I partnered with marketing and customer success teams to streamline processes and improve conversion rates. This aligns with TeamViewer's emphasis on collaboration and teamwork across departments.

What excites me most about TeamViewer is its innovative approach to remote connectivity, harnessing technologies like Augmented Reality and Artificial Intelligence to shape the future of digitalization. The opportunity to contribute to this vision while gaining hands-on experience in inside sales resonates deeply with my aspirations to build a career in business development and sales.

Thank you very much for considering my application. I am eager to bring my skills, enthusiasm, and drive to TeamViewer and look forward to discussing my fit for the role in further detail.

Sincerely,
Shruthi Sankaranarayanan
